B. Short Bio

Roberta Ferrario is a researcher at the Institute for Cognitive Sciences and Technologies of the CNR, the Italian National Research Council, and she works in Trento. She has accomplished her PhD in Philosophy in 2003, under the scope of a co-tutorship program between the Universities of Milan (Italy) and Strasbourg (France). She has spent an academic year at the Suppes Center for the Interdisciplinary Study of Science and Technology of Stanford University. Back in Trento, she has worked on ontology of mind, of organizations and of services. Lately, her research interests have been on ontology of socio-technical systems, on the integration of ontological and probabilistic approaches and on relational ontologies. She has been PI of the VisCoSo project (2012-2016), a three year “Research Unit” project grant awarded 600K euros by the Autonomous Province of Trento. She is Co-Editor-in-chief of the International journal Applied Ontology (IOS Press) and member of the Executive Council of the International Association of Ontology and its Applications (IAOA); she has been PC Co-chair of the 9th

International Conference on Formal Ontology in Information Systems (FOIS 2016) and co-founder of series of workshops like CONTACT (Computer vision + ONTOlogies: Applied Cross-disciplinary Techniques) and FOMI (Formal Ontology Meets Industry). She's author of a monograph and more than 80 scientific articles and book chapters on social ontology, ontology of services, ontology of mental entities, philosophy of language.
